#### WIND COMPASS

HERE IS SOMETHING NEW AND USEFUL AS WELL AS A NOVELTY. Many activities depend on the wind, and this instrument gives you the correct wind direction at any time of day or night at a glance, for you can have it on the wall in any room of your house. It works day and night and there are no springs to wind or adjustments to make once it is set up. The wind operates it. Very useful in homes, on farms, your cabin on the lake or woods, in ranger fire stations, airports, etc. In ordering, give the distance (in height) from where you will place the compass in the room on the wall, to the roof where you want the vane. Comes complete with mounting directions, so that anyone can put it up. State your choice of vane type (either arrow or disks). The colors are pale green, Ivory, pale blue, red or black, or clear unpainted maple.
